

7.1.3 Quality audits on environment:

The Institution has facilities and initiatives for

- 1.Green audit
- 2.Energy Audit
- 3.Clean and green campus initiative
4. Beyond the campus environment

1. Green Audit

The Green Audit is based on environmental laws and practices of IET, Bhaddal Technical Campus, encompassing the 360-degree environmental aspects of an educational institution. It includes environmental management, pollution control, and environmental initiatives. A comprehensive Green Audit delves into various facets of IET Bhaddal Technical Campus environmental footprint, ensuring a holistic assessment of its environmental management practices. The report is included.

2. Energy Audit

An energy audit is a comprehensive evaluation and analysis of IET, Bhaddal Technical Campus current energy use. Results from energy audits provide insight for building owners and also identify the most economical and energy-saving opportunities. The report is included.

3. Clean and Green Campus initiative

Tree plantation is a regular exercise so as to be close to nature and for making our atmosphere pollution free. There is a herbal garden which has numerous herbs growing in it. There is restricted entry of vehicles in the campus. Check point is there to ensure that. There is less pollution because of that. Pedestrian friendly pathways are there. Say no to plastics and say no to single use plastics boards are there in the campus so as to lay emphasis on no usage of single use plastics. Energy saver banners are there in campus to lay stress on energy conservation .Say no to plastics boards are there in the campus so as to lay emphasis on no usage of single use plastics. Plastics are non-biodegradable and possess a threat to the environment. Such banners help to sensitize the students and faculty to minimize the usage of them.IET Bhaddal aims to be plastic free organization. A cleanliness drive was also organized by the campus which aimed at keeping the campus clean and green.
